Empowering the supply chain with AI-powered innovation

uTenant is proud to announce a strategic partnership with **provenio.ai**, an award winning, Australian artificial intelligence (AI) company transforming back-office operations across supply chains.

Already trusted by some of Australia's most iconic businesses, this collaboration between uTenant and provenio.ai introduces industry-defining solutions that are designed to address many of the industry's biggest challenges:

- Manual, paper-based document workflows
- Inefficiencies in freight and logistics spend
- Margin erosion and delayed cash cycles
- Complex, high-volume, and monotonous data processing

"This is an exciting evolution for uTenant and adds to the already unique services we offer businesses," said Greg Wuest, Managing Director of uTenant. "In an era where businesses are under pressure to reduce costs, improve transparency, and achieve ESG targets, across their supply chain, the partnership solutions will tackle these core pain points and potentially more," added Greg.

Built for third-party logistics service providers (LSPs) and the businesses they serve; the transformative AI solutions will deliver:

- Reduced operating costs and improved margins
- Efficiency and productivity gains
- Improved processing and time-to-cash cycles
- More sustainable operations and workloads
- Enriched data and better insights

Dan Pace, Co-Founder and Executive Director of provenio.ai stated, "This partnership represents an exciting and strategic opportunity for our businesses and clients – bringing together AI capability with far-reaching commercial relationships that are founded on trust and value. There's a genuine buzz about the team as we are thrilled to be a part of the uTenant ecosystem. We look forward to working closely with uTenant to help supply chain and logistics businesses drive smarter, more efficient outcomes."

"This alliance is structured to ensure mutual value capture while empowering customers with tangible productivity and financial improvements," explained Greg. "We look forward to announcing more details in the coming months."

In a market demanding greater transparency, efficiency, and resilience, uTenant and provenio.ai are proud to help set a new standard for supply chain performance.

About provenio.ai

provenio.ai is an Australian owned and operated company, passionate about helping businesses succeed, using ethical and explainable AI. They are an artificial intelligence (AI) and machine learning (ML) solution provider, specialising in the supply chain middle and back-office operations. Provenio's AI-platform, Logidox, transforms fragmented freight and logistics documents and images into structured data - feeding critical business systems to enable faster, smarter operations.
